HUMAN PERFORMANCE AND LONGEVITY

YOUR PERSONAL NEUROPATHY WORKBOOK

The Neuropathy Clarity Scorecard

7-Minute Self-Assessment + 7-Day Symptom Tracker

When your feet feel different, it matters.

Numbness. Tingling. Burning. Coldness. A tight band around your foot. Or the unsettling feeling that the floor is harder to sense.

Even without pain, these changes deserve attention. Use this scorecard to organize what you feel and what it is changing in your life.

IN JUST 7 MINUTES

Identify your symptoms, measure their daily impact, and prepare better questions for a clinician.

Start on the next page. Your answers are for you—and can be shared with Sigma Core Medical Center or any healthcare professional.

YOUR 7-MINUTE SELF-ASSESSMENT

Check YES or NO for each sensation you have noticed. These experiences can occur with neuropathy, but this scorecard cannot diagnose its cause.

NAME (OPTIONAL) _____ DATE _____

WHAT ARE YOU EXPERIENCING?	YES	NO
Numbness / reduced feeling in feet or toes	☐	☐
Tingling	☐	☐
Burning or hot sensations	☐	☐
Cramping in feet or legs	☐	☐
Feet that feel unusually cold	☐	☐
Pins and needles	☐	☐
Spider-like or crawling sensations	☐	☐
Tight band or squeezing around the foot	☐	☐
Socks feel rolled up beneath your toes	☐	☐
Electrical shocks or sudden jolts	☐	☐
Sharp, stabbing or shooting sensations	☐	☐
Balance problems / feeling unsteady	☐	☐
Difficulty sensing the floor beneath you	☐	☐
Bedsheets or light touch feel uncomfortable	☐	☐
Weakness or trouble lifting the front of the foot	☐	☐

WHERE DO YOU NOTICE THEM? ☐ Left foot ☐ Right foot ☐ Both feet ☐ Hands too

HOW LONG? ☐ Under 1 month ☐ 1–6 months ☐ 6–12 months ☐ Over a year

ARE SYMPTOMS CHANGING? ☐ Improving ☐ About the same ☐ Worsening

DAILY-LIFE IMPACT

Circle one number per row: 0 = none 1 = mild 2 = moderate 3 = major

Sleep and rest	0	1	2	3
Walking / standing	0	1	2	3
Balance and confidence	0	1	2	3
Hobbies, errands, or family activities	0	1	2	3

ADD YOUR FOUR RATINGS: _____ / 12

Impact only; not a diagnostic score

YOU CAN SCHEDULE NOW—NO NEED TO WAIT SEVEN DAYS. 804-486-7699

YOUR 7-DAY SYMPTOM TRACKER

Use this while waiting for your consultation. You do not need to finish all seven days before scheduling. Bring your answers to Sigma Core—or another healthcare professional.

MY THREE MOST CONCERNING SYMPTOMS

1. 2. 3.

DAY	WORST SYMPTOM 0–10	SLEEP DISRUPTED?	BALANCE CONCERN?	MAIN ACTIVITY AFFECTED	SYMPTOM NOTES
1	____	Y / N	Y / N		
2	____	Y / N	Y / N		
3	____	Y / N	Y / N		
4	____	Y / N	Y / N		
5	____	Y / N	Y / N		
6	____	Y / N	Y / N		
7	____	Y / N	Y / N		

WHAT HAVE YOU ALREADY TRIED?

Check any that apply. A medication or device may help one symptom without resolving the others.

- ☐ Gabapentin
- ☐ Lyrica / pregabalin
- ☐ Cymbalta / duloxetine
- ☐ Electrical stimulation
- ☐ Shockwave therapy
- ☐ Cell-signaling device
- ☐ Other
- ☐ None

Did any treatment meaningfully improve your main symptoms?

☐ Yes ☐ Somewhat ☐ No ☐ Unsure ☐ Not applicable

Safety matters. If sensation is reduced, check your feet daily for sores or injuries; avoid heating pads on numb skin and remove tripping hazards. Sudden weakness, rapidly progressing changes, or other acute neurological symptoms deserve prompt medical assessment.

WHY HAVEN'T YOU FELT BETTER?

If you have told your doctors about numbness, tingling, coldness, or balance problems but still feel unheard, you are not alone. Many people find that the treatments they have tried do not address their most troubling symptoms.

HERE'S THE IMPORTANT DIFFERENCE.

Gabapentin, Lyrica (pregabalin), and Cymbalta (duloxetine) are commonly used for nerve-related pain. But if your main problems are numbness, tingling, coldness, cramping, or balance, pain relief may not address what matters most to you.

TRIED SHOCKWAVE, ELECTRICAL STIMULATION OR "CELL-SIGNALING" DEVICES?

Some people report temporary relief. But evidence that these approaches consistently restore lost sensation or improve numbness, tingling, coldness, cramping, or balance is limited and varies by device. Feeling stimulation is not proof of nerve recovery.

SIGMA CORE: MORE THAN A SINGLE TREATMENT

We developed our own CNC approach, informed by over a decade of working with neuropathy patients. Rather than a quick device session, we take a broader, individualized approach aligned with human performance and longevity.

C / CIRCULATION
Vascular health and blood-flow factors

N / NUTRITION
Metabolic and nutritional factors

C / COORDINATION
Sensation, balance and movement function

YOUR PERSONAL SUMMARY

My biggest concern is: _____

The activity I most want back: _____

Bring your completed scorecard to Sigma Core. Your free consultation is a chance to discuss your symptoms and explore whether a further evaluation or our CNC-based program may be appropriate. Treatment is individualized; results vary.
